

## Solving 2-step problems

Look at  $4 \times 3 + 7$ .

The bar model shows the calculation.

3 lots of 4 equals 12

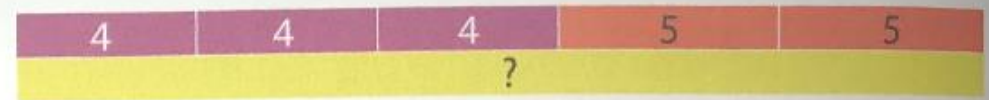

$$12 + 7 = 19$$

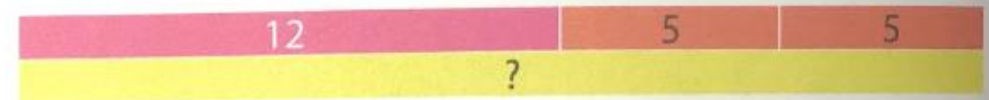

Always do multiplication before addition.

Look at  $4 \times 3 + 5 \times 2$ .

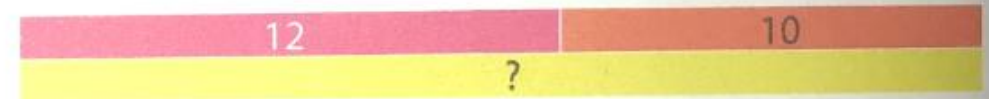

The bar model shows the calculation.

3 lots of 4 equals 12

2 lots of 5 equals 10

$$12 + 10 = 22$$
